**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-4,9-12 are, drawn to frequency translator with CORDIC phase rotator, classified in class 708, subclass 100+.
  - II. Claims 5-8,13-15,16-18 are, drawn to modem, classified in class 375, subclass 222.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions Group I and Group II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because any type of frequency translator with no detail of CORDIC phase rotator can be used. The subcombination has separate utility such as frequency translator with a detail of CORDIC phase rotator.
3. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Art Unit: 2637

4. A telephone call was made to Mr. David Isaacson on 11/19/04 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
